Senior Data Engineer

An experienced Software and Data Engineer with 10+ years of journey in the IT world. Founder of db-academy.io Wow effect maker, and a guy with interests in many IT-related areas

WORK EXPERIENCE

Xebia

Senior Data Engineer • Amsterdam, Netherlands • Full-time

06/2024 – Present

- Leading the development of a Python-based application for data ingestion between the internal systems.
- Actively designing and implementing robust data pipelines using the modern data stack
- Enhancing the developer experience (DevX) for both end-clients and colleagues by implementing best practices, tools, and processes

Picsart

Senior Data Engineer II • Yerevan, Armenia • Full-time

09/2020 – 03/2024

- Created tools and CI/CD pipelines for improving data products TTM (dev-envs, validation pipelines, release-pipelines, post-release activities) which led to up to 2x time reduction for TTM
- Led initiatives from scratch for Data Quality Stream and Data Cataloging, improving data accuracy and accessibility, which boosted data accuracy by 70% and improved data accessibility for all stakeholders.
- Managed and implemented data quality checks to identify data anomalies, enhancing data quality, data observability, and reliability. This led to a 50% reduction in data errors and up to 3x times reduction in data-related incidents.
- Reduced the cost of data storage, data processing, and cloud infrastructure expenses by 40% (AWS, Databricks)
- Created a validation pipeline for the onboarding of DS team members to the self-service environment. Significant reduction and prevention of data incidents in production env. Almost 0 cases of dumb mistakes on prod env
- Mentored colleagues through effective onboarding, performance improvement, and hiring initiatives, resulting in a 50% improvement in the data team's efficiency.

Luxoft

Lead Software Engineer (Data) • Moscow, Russia • Full-time

10/2018 – 09/2020

- Initiated the implementation of new approaches (algorithms, architectural changes, new concepts, etc), resulting in up to 2x reduction in data product's TTM and a 50% cost optimization on data-infrastructure

- Engineered large-scale batch and real-time data pipelines using data processing frameworks such as Spark, Hive (Tez), which processed over 10 terabytes of data daily, improving data processing efficiency.
- Increased data stability by 3X within 6 months by developing robust data engineering solutions leveraging Kafka, Hadoop, and Spark for seamless data availability.
- Led code review processes, performance evaluations, and new employee interviews. The team size increased >2x time (from 8 to 19 engineers), the number of critical bugs decreased (from 19 to 2 per year), and test coverage rate (from 0 to 81% - SonarQube)
- Initiated R&D for architectural concepts and broad technical initiatives, leading to the successful implementation of internal data frameworks (zealot - internal test-framework, germes - pipeline scheduler, Japper - template engine for generating sql-code (hello dbt)).

Other past experience

Senior Software Engineer (Data) • Moscow, Russia • Full-time

12/2016 - 09/2018

- Led the development of the BiGraph project, a Big Data-based system designed for corporate credit scoring analysis and the identification of non-trivial relationships using graph data
- Implemented business services involving graph data, handling datasets of up to 10TB (daily credit scoring calc service, fraud attempt alerter service, balance-sheet summarization, etc)
- Initiated and built an internal team-level dashboard for tracking the health of data-pipelines, which improvement 5x resource utilization efficiency, and cost-reduction and investment on on-prem Hadoop cluster

EDUCATION

Master's Degree In Big Data Systems

Higher School Of Economy • Moscow, Russia

09/2019 - 09/2021

Bachelor's Degree In Applied Informatics In Economics

Saratov State Technical University • Saratov, Russia

09/2011 - 09/2015

PROJECTS

db-academy.io

An educational portal focused on building an entire database from scratch, designed for middle and senior-level developers. Explore it at <https://db-academy.io>.

SKILLS

Apache Airflow, Apache Spark, CI/CD, Data as a Service, Database Internals, Databricks, Data Catalog, Data Lake, Data Pipelines, Data Processing, Data Quality, Data Warehouse, dbt, elementary-data, Google Cloud Platform, Java, PostgreSQL, Python, React / NextJS, Rust, SQL
